### FAIR Health outlines potential solutions to surprise billing problem

Kelly Gooch - 5 hours ago [Print](#) | [Email](#)

[SHARE](#) [Tweet](#) [Share 0](#)

FAIR Health, a national nonprofit focused on healthcare cost transparency, released a brief March 6 on the surprise billing debate to offer potential reimbursement solutions.

Federal lawmakers, providers, insurers, employers and consumer groups are all working together to reach consensus on the issue. Many states are also considering surprise billing issues.

Nearly all stakeholders agree that patients need to be protected from surprise bills involving unintended out-of-network services, including emergency services, FAIR Health said. However, a key issue in the debate is how to determine the amounts that health plans should pay to compensate providers for care rendered.

The organization outlined various potential reimbursement formulations — such as percentiles of billed charges, formulations based on allowed or negotiated amounts, a hybrid embodying both billed and allowed values, and a multiple of Medicare — which could be used to determine the amounts health plans should pay providers.

Another option for policymakers would be to implement a dispute resolution process between health plans and providers, with or without guidelines.

"The policy 'onion' gets peeled even further as parties consider whether, if independent dispute resolution is selected, should there be a guidepost for resolving the dispute [such as the New York law which uses FAIR Health's 80th percentile of billed charges as a guide for discussions, among other factors] or should it be a straight baseball arbitration format without any articulated standard," said Robin Gelburd, FAIR Health's president.

"Each state has its own particular interests to protect and constituents to recognize. Accordingly, it has been a fascinating legislative 'laboratory' to observe," Ms. Gelburd said.

Read FAIR Health's full brief [here](#).

# Emergency and Surprise Bills

- Goal: Protect Consumer –
  - *From* unexpected cost of out-of-network services at in-network facilities
    - Frequent issues: ER, lab, anesthesia, radiology, pathology
    - Network compensation – fee + volume
    - Volume issue for hospital-affiliated professionals
  - *By* limiting responsibility to in-network liability
- Approaches:
  - Transparency – advance fee information
  - Set standard
    - Percentile of billed charges
    - Formulation based on in-network negotiated rates (“allowed amounts”)
    - Medicare rates/multiple
  - Independent dispute resolution
    - Arbitration – with or without guideline/standard/reference point

# Codified Definition: NY Usual and Customary Cost (UCC)

---

- 80th percentile of charges for a particular service in a particular geographic area
- As reported in a benchmarking database maintained by a conflict-free not-for-profit organization not affiliated with an insurer or similar organization
- Plans are not required to reimburse at 80th percentile level but must articulate how they reimburse in comparison to UCC
  - Supports “apples-to-apples” comparisons
  - Supports dispute resolution
- *FAIR Health is the **only** data source officially recognized as UCC*

# Connecticut Consumer Protection Statute

---

Connecticut: FAIR Health 80th percentile is the UCR standard for payments for out-of-network emergency services.

## A Fair Price

If you had surgery or another procedure, it helps to know whether your hospital charged a fair price. **There are some websites you can use to help you find this information.** They use national databases of billed medical services. You enter the name of the procedure and your zip code to find an average or estimated price in your area.

- FAIR Health -- [www.fairhealth.org](http://www.fairhealth.org)

Robin Gelburd on New Law Requiring Hospitals to Post Prices Online

**Robin Gelburd** talked about the new Trump administration rule requiring hospitals to post the prices of various procedures online. Ms. Gelburd's organization, **FAIR Health**, is a non-profit consumer group that promotes health care cost transparency.

July 11, 2013

## Helping Consumers Navigate Claims Data

If the age of **medical cost transparency** is in fact upon us, then perhaps Oct. 27, 2009 might be cited as one of the key dates for this burgeoning movement. It was on that date that an organization by the name of Fair Health was created.

Other online tools are less convoluted, such as South Carolina Hospital Association's [cost comparison tool](#) and **Fair Health's national database.**

This page shows different estimates:

- **Blue circle:** shows the total non-negotiated full provider charge. This amount reflects the total cost of the primary procedure and related procedures/supplies (e.g., anesthesia, ocular lens). This is relevant to those without insurance or those seeking care out of network.
- **Orange circle:** shows the aggregated, de-identified in-network negotiated amount for the service. This amount reflects the total cost of the primary procedure and related procedures/supplies (e.g., anesthesia, ocular lens). This is relevant to those seeking in-network care who have not yet met their deductibles.

An insured consumer seeking to go out of network would click on "See out-of-network reimbursement" on the top left corner of the "Cost" tab.
